SUMMARY

Software Engineering undergraduate with hands-on experience in Java, Android, and web technologies, transitioning into QA. Designed test cases, performed manual regression testing, and documented bugs across multiple projects. Seeking a QA internship in a collaborative, Agile environment.

EDUCATION

BSc (Hons) Software Engineering | BCU, UK
via Java Institute for Advanced Technology

2023 – Present
Gampaha

PROJECTS

New Tech

02/2026 – 03/2026

Android M-commerce Application

- Developed EShop, an Android e-commerce application in Java with product browsing, cart management, and secure authentication. Integrated Firebase (Auth & Firestore) for real-time data, Google Maps for address handling, and PayHere for payments. Implemented category filtering, modern UI components, and image loading with Glide/ Picasso, ensuring smooth performance through testing and debugging.
- Designed and executed manual test cases for auth, cart, and payment flows, tracked defects and performed regression testing across device configurations.

Technologies: Java, Firebase, Android Studio

ScribbleBox

09/2025 – 10/2025

ToDo Mobile Application

- Developed a cross-platform ToDo mobile application using React Native (Expo) with a Java + Hibernate backend. Implemented task management features such as add, edit, and filter with real-time UI updates. Integrated AsyncStorage for offline caching and backend synchronization for seamless data handling. Designed a clean navigation flow and optimized performance to ensure a smooth and reliable user experience.
- Wrote test cases for CRUD operations and offline/online sync scenarios, documented and resolved identified bugs.

Technologies: Java, React Native, TypeScript, Mysql, Expo

Neol

04/2025 – 07/2025

Order Management System

- Order Management System with ERP features, a full-featured desktop application built using Java Swing and MySQL. It helps restaurants and small businesses manage their core operations - from customer ordering and kitchen workflow to inventory, HR, payroll, and administration.
- Conducted end-to-end manual testing of order, inventory, and payroll flows, tracked bugs from discovery to fix verification.

Technologies: Java, Java Swing, MySQL, Netbeans

SKILLS

- Testing & QA: Manual Testing, Test Case Design & Execution, Bug Tracking & Defect Reporting, Regression Testing, UAT
- Development: Java, Php, Html, Css, Javascript, React Native, MySql
- Tools: NetBeans, VS Code, Android Studio, Workbench, Trello, Github
- Methodologies: Agile, SDLC, Test Documentation
- Soft Skills: Problem Solving, Teamwork, Communication, Critical Thinking
